A *Seasonal* boiler is one that undergoes a shutdown for a period of at least seven (7) consecutive months or 210 consecutive days within a 12-month period due to seasonal conditions, except for periodic testing. Periodic testing shall not exceed a combined total of 15 days during the 7-month shutdown.

A *Limited Use* boiler is any boiler that burns any amount of solid or liquid fuels and has a federally enforceable average annual capacity factor of no more than 10%.
